

**Side 1: Draw here a flowchart reflecting the metagenomics workflow you plan to do today**

The flowchart does not have to be correct, it only has to reflect your planning and understanding before starting the practical. Name: .....

I approve that these flowcharts may be used as an anonymous data for scientific publication by Laura W Dijkhuizen MSc. Signature:.....

**Side 2: Draw here a flowchart after you finished the practical.**

Construct this flowchart after you finished the practical; make it as complete as possible. How does it compare to the first flowchart you made?
