

Side 1: Draw here a flowchart reflecting the metagenomics workflow you plan to do today

The flowchart does not have to be correct, it only has to reflect your planning and understanding before starting the practical.

I, approve that these flowcharts may be used as an anonymous data point for scientific publication by Laura W Dijkhuizen MSc.

Side 2: Draw here a flowchart while you progress in the practical.

‘Grow’ this flowchart during the practical, add steps while you do them and make it as complete as possible
